38      "updatedAt": "2026-05-29T17:35:26.228Z"
39    },
40    {
41      "id": 6,
42      "placas": "GRS-005",
```

Obtener Un solo carro método GET <https://carros-x2r2.onrender.com/api/carros/{id}>

Nos muestra un carro con el id específico que queremos obtener.

Crea Carro método POST <https://carros-x2r2.onrender.com/api/carros> corriendo en internet

Carro creado correctamente con el id 1, acá se insertan los datos en form-data.

Actualizar Carro método PUT <https://carros-x2r2.onrender.com/api/carros/1>

The screenshot shows a REST client interface for the endpoint `https://carros-x2r2.onrender.com/api/carros/1` using the `PUT` method. The request body is set to `form-data` with two fields: `serie` with value `esto se actualizara` and `color` with value `el color cambio`. The response is a `200 OK` status with a JSON body:

```
{
  "ok": true,
  "mensaje": "Carro actualizado correctamente",
  "data": {
    "id": 1,
    "placas": "R0J-01",
    "serie": "esto se actualizara",
    "color": "el color cambio",
    "foto": "https://carros.onrender.com/uploads/carro-1780875403979-836687920.jpg",
    "createdAt": "2026-05-29T17:23:23.986Z",
    "updatedAt": "2026-05-29T17:28:46.005Z"
  }
}
```

Se actualizo el carro de con el id 1 de forma correcta, acá es necesario agregar en el form-data, los campos que se quieran cambiar, y devuelve un json que donde muestra los cambios realizados.

Eliminar método DELETE <https://carros-x2r2.onrender.com/api/carros/{id}>

The screenshot shows a REST client interface for the endpoint `https://carros-x2r2.onrender.com/api/carros/1` using the `DELETE` method. The response is a `200 OK` status with a JSON body:

```
{
  "ok": true,
  "mensaje": "Carro eliminado correctamente"
}
```

Eliminando el carro con el id 1, de forma correcta. Para realizar la eliminación es necesario especificar el id que se quiere borrar.
